SCALEMASTER®

LimeStop!

Product code: 902234 (12 L/min)

THE REAL ALTERNATIVE TO A WATER SOFTENER

- 'Wholesome' drinking water
- Removes existing limescale
- Prevents new limescale forming
- Easy to install and maintain
- Environmentally friendly
- Provides whole house protection
- Uses no salt and no electricity
- No increase in sodium content

Limescale prevention without the hassle

Product code: 902210 (8 L/min)

FOR POINT OF USE PROTECTION WHERE SPACE IS A PREMIUM

- Green & eco-friendly
- No salt required
- No rinsing cycle, saving water
- No regeneration so no drain required
- No electricity
- No change in the chemical composition, retaining healthy minerals
- Maintains the efficiency of water heating apparatus
- Protects appliances that use hot water

SCALEMASTER LIMESTOP! Can be used where you want to prevent scale forming. Can be placed at point of use or point of entry to property.

POINT OF USE For local protection, where space is limited. A versatile solution that can be adapted to customers' needs.

POINT OF ENTRY To protect the entire water circuit in buildings against limescale. Scalemaster Limestop caters for various flow rates and needs no maintenance during the media life span.

THE HOW... Each bead is covered in imperfections called media templates that attract minerals (limescale & carbonate) and combine them to form micro-crystals that grow slowly. These crystals break off and pass through the system without sticking to pipes, fixtures, valves or heating elements.

Product code: 902258 (15 L/min)

TECHNOLOGY PROVEN TO WORK IN TESTS TO EXACTING GERMAN STANDARDS
