

LIMESTOP SL8 SCALE REDUCTION UNIT

EAN	5027639902210
Product Code	902210
Fitting Type	3/4" M BSP
Maximum Flow Rate	8 L/minute
Height	340mm
Diameter	190mm
Weight	4.53kg
Guarantee	2 Years
Cartridge Life	18 Months

TECHNICAL HELPLINE 01785 811636

Features & Benefits

- Green & Eco-friendly.
- No salt required.
- No rinsing cycle, saving water.
- No regeneration so no drain required
- No electricity, compact & easy installation.
- No change in the chemical composition retaining healthy minerals
- No effect on corrosion.
- Maintains the efficiency of water heating apparatus
- Protects appliances that use hot water
- Whole house protection

How does Limestop! work...?

Each bead is covered in imperfections called media templates that attract minerals (Limescale & Carbonate) and combine them to form micro-crystals that grow slowly. These crystals break off and pass through the system without sticking to the pipes, fixtures, valves or heating elements.

Scalemaster Limestop! Can be used where you want to prevent scale forming. It can be placed at point of use or point of entry to the property.

- **Point of use:** For local protection, where space is limited. A versatile solution that can be adapted to customers' needs.
- **Point of entry:** To protect the entire water circuit in buildings against Limescale.

Replacement cartridge should be changed every 18 months - Product Code: 902227
